

## Quality Assurance in Hospitality Case Study

How have our quality assurance experts helped our clients improve software development life cycle?

### BUSINESS NEED & SOLUTION

- Identify meaningful QA metrics from the current QC data to objectively measure QA performance.
- Fully automate periodic status reporting of QA metrics and reduce effort spent in manual report generation.

Built a generic dashboard framework sourcing metrics data from HP QC and SONAR platform.

Key Technology
<ul style="list-style-type: none"><li>• SAP Xcelcius 2008</li><li>• Business Objects</li><li>• Oracle Database 10G</li><li>• XML</li><li>• Linux</li></ul>

Results
<ul style="list-style-type: none"><li>• Achieved 60% reduction in time and effort spent in manual tracking of QA metrics and report generation</li><li>• Enabled well informed decision making by providing additional metrics with real-time view of the project data.</li><li>• Improved quality through optimized SDLC processes.</li></ul>
